

Gender Pay Gap 2019

Stockport Homes is proud to be an equal opportunities employer and we are committed to the fair treatment and reward and progression of all our staff irrespective of their gender. We work hard to ensure our team have a great work-life balance and every opportunity to develop.

Mean is the average hourly rate of pay and the percentage difference between males and females.

The Mean Gender Pay gap shows a slightly lower hourly rate for women than men.

Median is the middle hourly rate of pay and the percentage difference between males and females.

The difference is 9.4%. We remain committed to closing the gap and continue to work hard on areas we previously identified that include embedding flexible working in all teams; increasing women in trade and technical roles and implementing progression pathways. We are also exploring further areas that we think could make a difference, and are closely monitoring promotions and pay changes to check for any gender differentiation.

Meet our team

282
WOMEN

250
MEN

Lower pay quartile

Men: 45.1%
Women: 54.9%
